

Date: 14.08.2025  
Revision No: 05

The REACH Regulation (EC 1907/2006), which entered into force on 1 June 2007, was established by the European Union to ensure the safe use of chemicals and to aim for a high level of protection of human health and the environment. Under these provisions, all parties responsible for placing chemicals on the market are obliged to identify and manage the risks associated with the use of such substances.

Our company fully supports and implements all the requirements of the REACH Regulation. Another key objective of the regulation is to improve the exchange of information throughout the supply chain and to enhance transparency. As a “downstream user,” we actively exchange information with our suppliers whenever necessary.

Under REACH, any chemical substance manufactured or imported in quantities of 1 tonne or more per year must be registered with the European Chemicals Agency (ECHA). However, there are certain exceptions to this requirement. According to the Guidance on Requirements for Substances in Articles (May 2008) published by ECHA, our products are defined as “articles” rather than “substances” and are therefore not subject to the registration obligation. Furthermore, the main components of our products, polymers, are currently exempt from registration requirements under REACH.

In this context, our products do not require registration, as REACH registration obligations apply only to substances and mixtures (preparations). There are no restrictions on the raw materials we use during the pre-registration and registration phases.

\*This document covers the latest revisions mentioned below. Commission Regulation (EU) of 25 June 2025 amending Annex V to Regulation (EC) No 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

As MT Displays, based on the most recent legal provisions and the declarations obtained from our suppliers, we declare that the substances contained in our products do not exceed the 0.1% threshold for SVHC (Substances of Very High Concern):

- REACH Annex XVII – Restricted Substances List (latest 2025 version)
- REACH SVHC List (latest version published by ECHA in 2025)
- REACH Annex XIV – Authorisation List (2025 version)
- Commission Regulation (EU) 2019/1691 – Amendment to REACH Annex V

We will continue to follow all updates to the REACH legislation and related lists, fulfilling our responsibilities in terms of product safety and legal compliance.
